
LV DC system
MV AC 3phase system
$i_g^{dc}(t)$
$\vec{i}_g^{ac}(t)$
$u_g^{dc}(t)$
$\vec{u}_g^{ac}(t)$
SST does not store energy
DC input is a current source (parallel of 3N DAB)
AC output is a voltage source controlled in current
series of N single phase inverters
hypothesis: knowledge of the DC grid system status
hypothesis: knowledge of the AC grid system status
